Products Tested:	Elloto Online Lottery Platform

Report Number SY-120-ELP-26-01-120

File Numbers: SY-120-ELP-26-01

Testing Results: Complies

Software

A description of the submitted software is listed below.

1. Elloto Online Lottery Platform

Elloto Online Lottery Platform is a comprehensive, web-based solution designed to facilitate Player Account Management and Online Lottery Operations. It provides a seamless front-end user experience while ensuring compliance with regulatory requirements, including links for Responsible Participation, Terms and Conditions, and customer support details for handling inquiries and complaints.

Player Registration & Account Management

To participate in online lottery activities, users must first register an account and complete the identity verification process by submitting the required documentation.

The platform utilizes advanced identity verification technologies, including Face-to-Face Matching, which compares the user's selfie with the photograph contained in the identity document; Document Recognition, which extracts and validates data from submitted documents; and Liveness Detection, which confirms the presence of a real person in front of the camera and prevents the use of fraudulent identification methods such as masks, photographs, or video recordings.

These verification mechanisms are implemented to ensure that lottery participants meet the legal age requirements and to confirm that the account is being created and used by a real individual.

Once the verification process is successfully completed, the account becomes active, allowing the player to deposit funds and participate in available lottery products.

Key Features for Players

Through the web interface, players have access to a wide range of functionalities, including:

- User Account Management:
 - Registration with age and identity verification
 - Multi-factor authentication login
 - Profile and personal detail management
- Financial Transactions:
 - Balance refill and balance withdrawal
 - Transaction history for winnings, balance refill, and balance withdrawal
- Online Lottery Services:
 - Participation in both instant lottery games and draw-based lottery games
 - Access to participation history for both instant lottery games and draw-based lottery games
 - Responsible participation tools and controls

Online Lottery Components

Lottery Component

The lottery module offers a comprehensive range of online lottery products, including both draw-based online lottery games and instant lottery games. It includes built-in integrations with multiple content and service providers while also supporting the seamless addition of new providers to expand the lottery offering.

Back-Office Administration

The platform includes a robust back-office system, providing administrative control over all platform functions. Key modules include:

Reporting – Generation of detailed reports on financial transactions, lottery participation history, and operational performance.

Player Account Management – Full visibility and management of player profiles and activity.

Lottery Administration – Oversight of lottery products and provider integrations, including suspension controls.

System Logs – Comprehensive activity logs for both front-end and back-office operations.

Disclaimer

This document highlights the core functionalities of the platform. Additional features and capabilities exist beyond those described here.

For version-control of the software, following signatures were gathered:
